

10 Reasons Why Reusable Water Bottles are BETTER than Plastic Ones!

Makes Cents
The average water pitcher filters 240 gallons of water a day for about 19 cents a day vs. \$4.98 a day for the same amount of bottled water.

Tastes Better
In blind taste tests, people prefer the taste of tap water to bottled water.

Better for Your Health
Plastic water bottles can leak endocrine-disrupting chemicals.

Less Waste
Despite recycling efforts, 6 out of 7 plastic bottles consumed in the U.S. are still sent to landfills.

Reap the Rewards
Treat yourself with the money you saved drinking tap water.

Saves Water

It takes three times the water to make a plastic water bottle as it does to fill it!

More Affordable

The recommended 8 glasses of water per year = \$49
That same amount of bottled water = \$1,400

More Convenient

Filling up a reusable water bottle is just easier than going to the store to buy water!

More Reliable Source

Did you know 25% of bottled water is actually sourced from the tap.

Supports Local Resources

Promotes the use and care of local water, which is also used to grow and cook healthy local foods.
